

Winder

**Compact slitter with
integrated unwinding station**

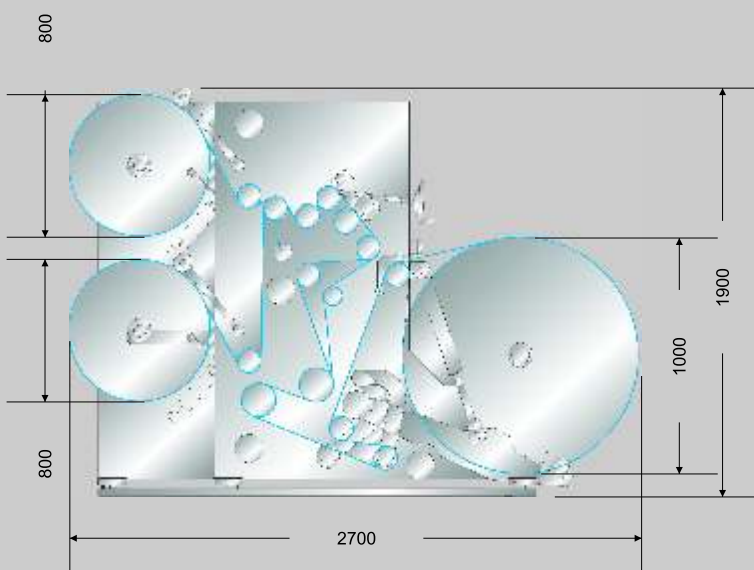

**High performance machines
for slitting and rewinding
flexible materials**

Winder - compact slitter with integrated unwind station

Winder slitter is the result of continuous innovation process which is the answer to the growing demand for optimal slitting process. The technologically advanced control systems and an ergonomic design makes Winder slitter the ideal solution for a high performance slitting of various flexible materials on a space saving slitter. The state of the art.. automatic devices such as the automatic knife positioning system, laser core positioning system, sophisticated control via touch screen panel allow slitting tension sensitive materials as well as thick self-adhesive materials on one slitter.

Web width	Diameter of the reel on unwind	Diameter of the reel on rewind	Maximum speed
1000mm	1000mm	600mm/800mm as option	500m/min
1300mm	1000mm	600mm/800mm as option	500m/min
1600mm	1000mm	600mm/800mm as option	500m/min
1850mm	1000mm	600mm	450m/min

Example of materials: printed / unprinted foil (PE,PP,PA,PS,PET and others), metalised films, hot stamping foil, laminates, labelstock film, paper.

Shaftless unwind

Model for HSF
